

Hello sir..!!

Good afternoon..

I am shivakumar.. "5a5c1fcd this is my code" I noticed a discrepancy in the budget where I contributed a certain amount, but it seems double was allocated... Could you please clarify the allocation process for better understanding.. I'm curious to know about the factors that led to this financial decisions

"I have seen the hesitations due to potential scams.. It's crucial to do thorough research before investing..

How could you double our contribution...?? "

If i know about this thoroughly I can refer others sir.. So i asked you

Thanku for your response sir..

Sure I'll refer many

Ok thank you sir..

Sir, it doesn't matter. Please describe in detail what your problem is?

You can pay attention to the work and the news content released by Telegram. The ES equipment product launched yesterday is to double the profit and is now sold out. Please actively pay attention to the work group and the content sent by Telegram. You can learn more knowledge about making money.

At the same time, now is the best time to invite friends to join. You can get invitation bonuses and lottery opportunities, as well as team commissions and daily wages.

First of all, everyone needs to understand the withdrawal rules of EVgo

- 1..Withdrawal time is 24-48 hours! Generally, your withdrawal will be completed within 24 hours. If there is congestion in the bank network, it will be slower, but it will not exceed 48 hours.
2. You can initiate withdrawals every day, there are no holiday restrictions!
3. The withdrawal amount of rupee is 130-100000Rs, the withdrawal amount of USDT is 30-5000 USDT
4. Every member's funds are supervised by the Indian government departments and are very safe.

Regarding bank account issues:

1. The bank account you submit in your EVgo work account is only used to withdraw your work income, and your bank account information and personal information will be kept confidential. The company is regulated by the Indian government and the International Financial Commission, so your funds are very safe, please don't worry.

Our company was established in 2010. The EVGO project was first launched in the United States in 2010. It has achieved success in many countries and is still going on. In May 2022, EVGO began to launch charging pile equipment in India. At present, the first batch of users have started to use it and have already made money. EVGO's ideal is to realize online and offline economic sharing through the Internet of Things.

100 EVgo is one of the largest public fast charging networks in the United States, with approximately 3,000 fast charging stations in multiple metropolitan areas around the world. Since its founding in 2010, EVgo has been leading the way towards a cleaner transportation future. 👍❤️

For example: a piece of EV100S equipment costs about US\$30,000. Including the cost of site purchase and construction, it will cost about US\$38,000. In terms of online functions, equipment and system maintenance, etc., it will cost about US\$38,000. \$40,000. For us investors, we can choose to purchase and invest in the site in one go, but only the investors will always reap the benefits.

On the contrary, if we have 5,000 members who purchase EV100S equipment, then we can set up a charging station offline. When the lease period ends, as long as someone is maintaining the charging station, the income will always be there. EVGO will hand over the income from the charging station for the next 10 years to the local government in the third year. Therefore, our members will benefit, the company will benefit, and the government will benefit. This is a 3-win situation.

When withdrawing funds, each member needs to fill in the correct bank account information so that they can withdraw money quickly!

IFSC is an eleven-digit number, the fifth digit is the number 0

If you use the wrong bank account information, this will only delay your withdrawal time

In any industry, legality is crucial. EVgo was founded in 2010 and has multiple charging stations around the world. A forward-thinking and helpful green company whose business model and trends are aligned with today and the future. This kind of cooperation is healthy, sustainable, safe and trustworthy. Therefore, anyone can work at EVgo with confidence.
